

## Bootstrap: Tabs

### Basic Example

Add quick, dynamic tab functionality to transition through panes of local content, even via dropdown menus.

Home

Profile

Dropdown▼

Egestas fringilla phasellus faucibus scelerisque eleifend donec. Hendrerit dolor magna eget est lorem ipsum. Aenean et tortor at risus viverra adipiscing. Blandit turpis cursus in hac habitasse platea dictumst quisque sagittis. Auctor eu augue ut lectus.

```
class Demo extends React.Component {
  handleSelect(itemprops) {
    alert(itemprops.pane);
  }
  render() {
    return (
      <TabContainer>
        <TabList bsStyle='orange75' onTabSelect={this.handleSelect}>
          <Tab pane='tab1' active>Home</Tab>
          <Tab pane='tab2'>Profile</Tab>
          <TabDropdown title='Dropdown' menu-props={{bsStyle: 'orange75'}}>
            <Tab pane='tab3'>
              @fat
            </Tab>
            <Tab pane='tab4'>
              @mdo
            </Tab>
          </TabDropdown>
        </TabList>
        <TabContent>
          <TabPane>
            <LoremIpsum query='5s' />
          </TabPane>
          <TabPane>
            <LoremIpsum query='5s' />
          </TabPane>
          <TabPane>
            <LoremIpsum query='5s' />
          </TabPane>
          <TabPane>
            <LoremIpsum query='5s' />
          </TabPane>
        </TabContent>
      </TabContainer>
    );
  }
}
```

## Bootstrap: Pills

### Basic Example

Similar markup to Tabs as above. Even the API is same as we reuse the same component.

HomeProfileDropdown▼

Ligula ullamcorper malesuada proin libero nunc consequat interdum varius. Urna molestie at elementum eu facilisis sed odio. Nibh praesent tristique magna sit amet purus gravida quis. Est sit amet facilisis magna etiam. Enim eu turpis egestas pretium aenean pharetra magna ac placerat.

```
<TabContainer id='tab-2'>
  <TabList pills bsStyle='orange75'>
    <Tab active>Home</Tab>
    <Tab>Profile</Tab>
    <TabDropdown title='Dropdown' menu-props={{bsStyle: 'orange75'}}>
      <Tab>
        @fat
      </Tab>
      <Tab>
        @mdo
      </Tab>
    </TabDropdown>
  </TabList>
</TabContainer>
<Grid>
  <Row>
    <Col xs={12}>
      <TabContent tabContainerID='tab-2' style={{marginTop: 12.5}}>
        <TabPane>
          <LoremIpsum query='5s' />
        </TabPane>
        <TabPane>
          <LoremIpsum query='5s' />
        </TabPane>
        <TabPane>
          <LoremIpsum query='5s' />
        </TabPane>
        <TabPane>
          <LoremIpsum query='5s' />
        </TabPane>
      </TabContent>
    </Col>
  </Row>
</Grid>
```

### Justified pills

Easily make tabs or pills equal widths of their parent.

Home

Profile

Dropdown▼

Sed arcu non odio euismod lacinia at quis risus sed. Nulla porttitor massa id neque. Eu scelerisque felis imperdiet proin fermentum leo vel orci porta. Vehicula ipsum a arcu cursus vitae. Arcu odio ut sem nulla pharetra.

```
<TabContainer>
  <TabList pills justified bsStyle='orange75'>
    <Tab active>Home</Tab>
    <Tab>Profile</Tab>
    <TabDropdown title='Dropdown' menu-props={{bsStyle: 'orange75'}}>
      <Tab>
        @fat
      </Tab>
      <Tab>
        @mdo
      </Tab>
    </TabDropdown>
  </TabList>
  <TabContent style={{marginTop: 12.5}}>
    <TabPane>
      <LoremIpsum query='5s' />
    </TabPane>
    <TabPane>
      <LoremIpsum query='5s' />
    </TabPane>
    <TabPane>
      <LoremIpsum query='5s' />
    </TabPane>
    <TabPane>
      <LoremIpsum query='5s' />
    </TabPane>
  </TabContent>
</TabContainer>
```
