

# Bootstrap: Pagination

## Basic Example

Provide pagination links for your site or app with the multi-page pagination component, or the simpler pager alternative.

«

1

2

3

4

5

»

```
<Pagination>
  <Page begin disabled />
  <Page active href='#'>2</Page>
  <Page href='#'>2</Page>
  <Page href='#'>3</Page>
  <Page href='#'>4</Page>
  <Page href='#'>5</Page>
  <Page end />
</Pagination>
```

## Sizing

Fancy larger or smaller pagination? Add `lg` or `sm` for additional sizes.

«

1

2

3

4

5

»

«

1

2

3

4

5

»

«

1

2

3

4

5

»

```
<Pagination lg>
  ...
</Pagination>
<Pagination>
  ...
</Pagination>
<Pagination sm>
  ...
</Pagination>
```

## Pager

Quick previous and next links for simple pagination implementations with light markup and styles. It's great for simple sites like blogs or magazines.

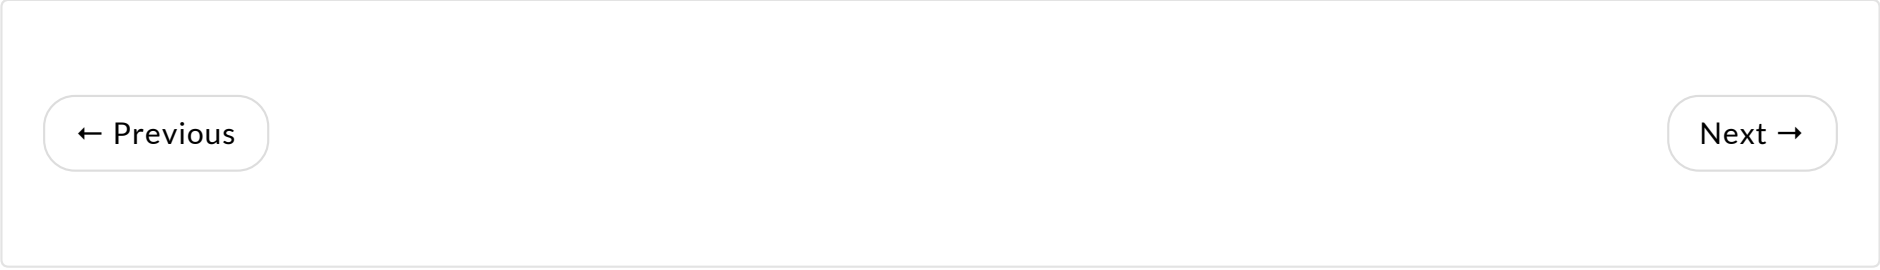

Previous

Next

```
<Pager>
  <Page href='#'>Previous</Page>{' '}
  <Page href='#'>Next</Page>
</Pager>
```

Aligned links

Alternatively, you can align each link to the sides (with optional disabled state).

```
<Pager>
  <Page previous disabled href='#'>Previous</Page>{' '}
  <Page next href='#'>Next</Page>
</Pager>
```
