Bootstrap: Input Groups

Basic Example

Extend `Input` components by adding text or buttons before, after, or on both sides of any text-based input. Use `InputGroup` with an `InputGroupAddon` to prepend or append elements to a single `Input`.

| @ | Username |

| | .00 |

| $ | | .00 |

```
<InputGroup>
  <InputGroupAddon>@</InputGroupAddon>
  <Input type='text' placeholder='Username'/>
</InputGroup><br/>
<InputGroup>
  <Input type='text'/>
  <InputGroupAddon>.00</InputGroupAddon>
</InputGroup><br/>
<InputGroup>
  <InputGroupAddon> $ </InputGroupAddon>
  <Input type='text'/>
  <InputGroupAddon>.00</InputGroupAddon>
</InputGroup>
```

Sizing

Add the relative form sizing classes to the `InputGroup` itself and contents within will automatically resize—no need for repeating the form control size classes on each element.

| @ | Username |

| @ | Username |

| @ | Username |

```
<InputGroup lg>
  <InputGroupAddon>@</InputGroupAddon>
  <Input type='text' placeholder='Username'/>
</InputGroup><br/>
<InputGroup>
  <InputGroupAddon>@</InputGroupAddon>
  <Input type='text' placeholder='Username'/>
</InputGroup><br/>
<InputGroup sm>
  <InputGroupAddon>@</InputGroupAddon>
  <Input type='text' placeholder='Username'/>
</InputGroup>
```

Checkboxes and Radio addons

Place any checkbox or radio option within an `InputGroupAddon` instead of text..

☐	Username		◯	Username

```
<Grid>
  <Row>
    <Col xs={6}>
      <InputGroup>
        <InputGroupAddon><Checkbox native/></InputGroupAddon>
        <Input type='text' placeholder='Username'/>
      </InputGroup>
    </Col>
    <Col xs={6}>
      <InputGroup>
        <InputGroupAddon><Radio native/></InputGroupAddon>
        <Input type='text' placeholder='Username'/>
      </InputGroup>
    </Col>
  </Row>
</Grid>
```

Button addons

GO!	Username		Username	GO!

```
<Grid>
  <Row>
    <Col xs={6}>
      <InputGroup>
        <InputGroupButton><Button onlyOnHover>Go!</Button></InputGroupButton>
        <Input type='text' placeholder='Username'/>
      </InputGroup>
    </Col>
    <Col xs={6}>
      <InputGroup>
        <Input type='text' placeholder='Username'/>
        <InputGroupButton><Button onlyOnHover>Go!</Button></InputGroupButton>
      </InputGroup>
    </Col>
  </Row>
</Grid>
```

Button with dropdowns

ACTION ▾	Username		Username	ACTION ▾

```
<Grid>
  <Row>
    <Col xs={6}>
      <InputGroup>
        <InputGroupButton dropdown>
          <DropdownButton onlyOnHover>
            <span>Action </span><Caret/>
          </DropdownButton>
          <Menu>
            <MenuItem href='#'>Action</MenuItem>
            <MenuItem href='#'>Another Action</MenuItem>
            <MenuItem href='#'>Something else here</MenuItem>
            <MenuItem divider></MenuItem>
            <MenuItem href='#'>Separated link</MenuItem>
          </Menu>
        </InputGroupButton>
        <Input type='text' placeholder='Username'/>
      </InputGroup>
    </Col>
    <Col xs={6}>
      <InputGroup>
        <Input type='text' placeholder='Username'/>
        <InputGroupButton dropdown>
          <DropdownButton onlyOnHover>
            <span>Action </span><Caret/>
          </DropdownButton>
          <Menu alignRight>
            <MenuItem href='#'>Action</MenuItem>
            <MenuItem href='#'>Another Action</MenuItem>
            <MenuItem href='#'>Something else here</MenuItem>
            <MenuItem divider></MenuItem>
            <MenuItem href='#'>Separated link</MenuItem>
          </Menu>
        </InputGroupButton>
      </InputGroup>
    </Col>
  </Row>
</Grid>
```

Segmented buttons

| ACTION ▾ | Username | | Username | ACTION ▾ |

```
<Grid>
  <Row>
    <Col xs={6}>
      <InputGroup>
        <InputGroupButton dropdown>
          <Button onlyOnHover>Action </Button>
          <DropdownButton onlyOnHover>
            <Caret/>
          </DropdownButton>
          <Menu>
            <MenuItem href='#'>Action</MenuItem>
            <MenuItem href='#'>Another Action</MenuItem>
            <MenuItem href='#'>Something else here</MenuItem>
            <MenuItem divider></MenuItem>
            <MenuItem href='#'>Separated link</MenuItem>
          </Menu>
        </InputGroupButton>
        <Input type='text' placeholder='Username'/>
      </InputGroup>
    </Col>
    <Col xs={6}>
      <InputGroup>
        <Input type='text' placeholder='Username'/>
        <InputGroupButton dropdown>
          <Button onlyOnHover>Action </Button>
          <DropdownButton onlyOnHover>
            <Caret/>
          </DropdownButton>
          <Menu alignRight>
            <MenuItem href='#'>Action</MenuItem>
            <MenuItem href='#'>Another Action</MenuItem>
            <MenuItem href='#'>Something else here</MenuItem>
            <MenuItem divider></MenuItem>
            <MenuItem href='#'>Separated link</MenuItem>
          </Menu>
        </InputGroupButton>
      </InputGroup>
    </Col>
  </Row>
</Grid>
```
