# Bootstrap: Progress bars

## Basic Example

Provide up-to-date feedback on the progress of a workflow or action with simple yet flexible progress bars.

```
<Progress value={60} min={0} max={100} />
```

With label

60%

```
<Progress withLabel value={60} min={0} max={100} />
```

Contextual alternatives

Progress bars use some of the same button and alert classes for consistent styles.
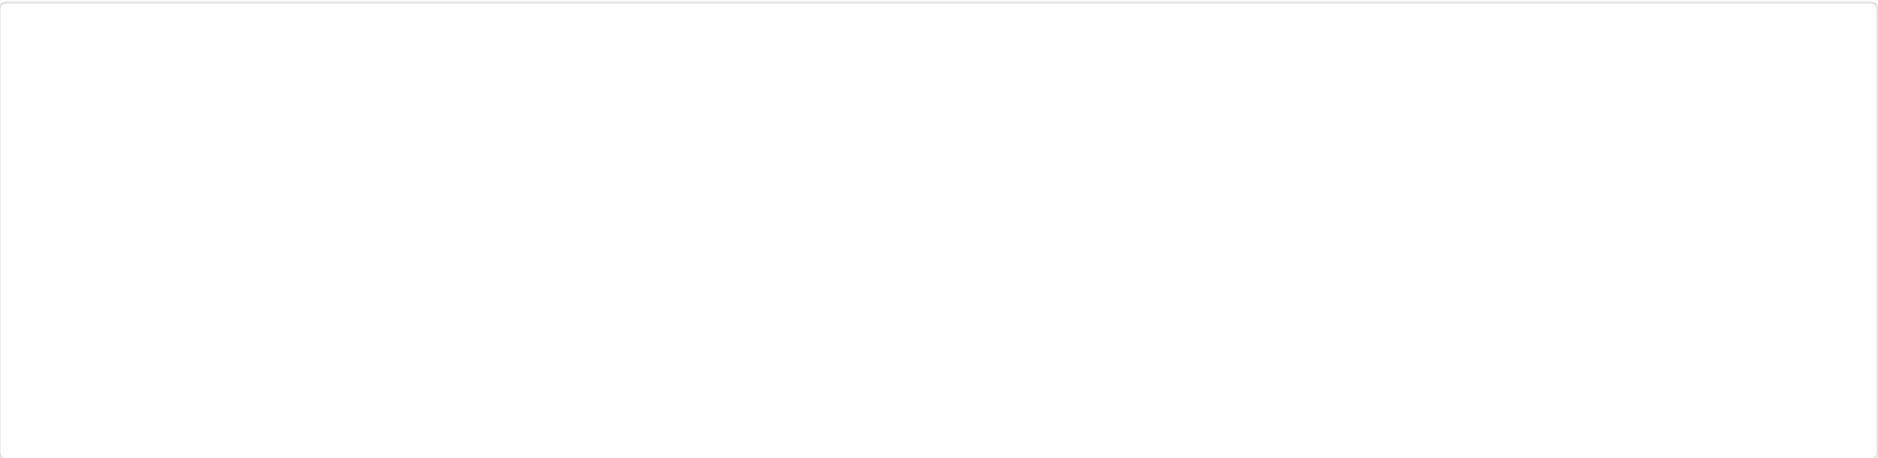

```
<Progress success value={40} min={0} max={100} />
<Progress info value={20} min={0} max={100} />
<Progress warning value={60} min={0} max={100} />
<Progress danger value={80} min={0} max={100} />
```
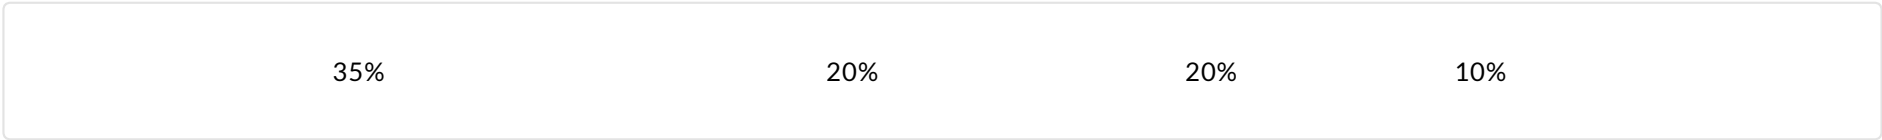

Striped

Uses a gradient to create a striped effect.

```
<Progress striped success value={40} min={0} max={100} />
<Progress striped info value={20} min={0} max={100} />
<Progress striped warning value={60} min={0} max={100} />
<Progress striped danger value={80} min={0} max={100} />
```

Animated

Add active to animate the stripes right to left.

```
<Progress striped active success value={40} min={0} max={100} />
<Progress striped active info value={20} min={0} max={100} />
<Progress striped active warning value={60} min={0} max={100} />
<Progress striped active danger value={80} min={0} max={100} />
```

Stacked

Place multiple progress bars by stacking them in a ProgressGroup.

| 35% | 20% | 20% | 10% |

```
<ProgressGroup collapseBottom>
  <Progress active striped info withLabel value={35} min={0} max={100} />
  <Progress active striped danger withLabel value={20} min={0} max={100} />
  <Progress active striped warning withLabel value={20} min={0} max={100} />
  <Progress active striped success withLabel value={10} min={0} max={100} />
</ProgressGroup>
```
