Bootstrap: Textarea

Form control which supports multiple lines of text. Change rows attribute as necessary.

```
<Textarea rows='3' />
```

Bootstrap: Rubix Enhancements [API]

node

Access the raw DOM Node. Example:

```
class Demo extends React.Component {
  componentDidMount() {
    var node = this.refs.textareaelement.node;
    console.log(node.getAttribute('rows') === 3);
  }
  render() {
    return (
      <Textarea ref='textareaelement' rows='3' />
    );
  }
}
```

value

Convenience function to get the value of the raw input dom element. Example:

```
class Demo extends React.Component {
  componentDidMount() {
    var value = this.refs.textareaelement.value;
    console.log(value === 'Default Value');
  }
  render() {
    return (
      <Textarea ref='textareaelement' rows='3' defaultValue='Default Value' />
    );
  }
}
```
