Bootstrap: Alerts

Basic Example

Provide contextual feedback messages for typical user actions with the handful of available and flexible alert messages.

Well done! You successfully read this important alert message.

Heads up! This alert needs your attention, but it's not super important.

Warning! Better check yourself, you're not looking too good.

Oh snap! Change a few things up and try submitting again.

```
<Alert success>
  <strong>Well done!</strong> You successfully read this important alert message.
</Alert>
<Alert info>
  <strong>Heads up!</strong>{" This alert needs your attention, but it's not super import
ant."}
</Alert>
<Alert warning>
  <strong>Warning!</strong>{" Better check yourself, you're not looking too good."}
</Alert>
<Alert danger collapseBottom>
  <strong>Oh snap!</strong>Change a few things up and try submitting again.
</Alert>
```

Dismissible alerts

Build on any alert by adding an optional `dismissible` property.

Warning! Better check yourself, you're not looking too good.   ×

```
<Alert warning dismissible collapseBottom>
  <strong>Warning!</strong>{" Better check yourself, you're not looking too good."}
</Alert>
```

Links in Alerts

Use the `AlertLink` component to quickly provide matching colored links within any alert.

Well done! You successfully read **this important alert message**.

Heads up! This **alert needs your attention**, but it's not super important.

Warning! Better check yourself, you're **not looking too good.**

Oh snap! Change a few things up and try submitting again.

```
<Alert success>
  <strong>Well done!</strong> You successfully read <AlertLink href='#'>this important al
ert message</AlertLink>.
</Alert>
<Alert info>
  <strong>Heads up!</strong> This <AlertLink href='#'>alert needs your attention</AlertLi
nk>{", but it's not super important."}</Alert>
<Alert warning>
  <strong>Warning!</strong>{" Better check yourself, you're "}<AlertLink href='#'>not loo
king too good.</AlertLink>
</Alert>
<Alert danger collapseBottom>
  <strong>Oh snap!</strong> <AlertLink href='#'>Change a few things up</AlertLink> and tr
y submitting again.
</Alert>
```
